  Developed a website for sportsmen, guns reviews, hunting, fishing etc.

Final Year Project

Business Management Information System (Java, Spring MVC, Hibernate, Angular2+)
Business Management Information System (BMIS) is a web application to facilitate management of small to medium scale businesses. It contains different modules i.e. Suppliers Management, Customer Management, Purchase Management, Sales Management, Multiple Warehouses Management, Accounts Management and Users Management with Role Based Security. The application is developed using Service Oriented Architecture (SOA). Organization's other systems can be integrated with BMIS using web services and we can make Android and IOS based mobile apps using the already developed web services or same backend infrastructure.
